June 7.
Left Flagstaff Ariz by auto for Kaibab about 9 A.M. with R.A. Nichol, Dr. Shantz and a Mr. Kerr. Mode second trip in another car. Arrived N.7. about 7.30 PM.
Good feed in Ponderosa Valley. Abundant growth of Arguione in flower in places

June 8.

Trip to Sowats Point and western side of Jones north to a point within 7 miles of Big Springs.

Deer. Saw some deer last night when we came out on top of mt. east of Jacob Lake, and about 20 only at V.T. Rust says they have been appearing for only a few days at V.T. One deer only was seen on west side but passed by those of us in one car today.

Forage. Except on ends of flats shows marked improvement over last years ago.

Mann says about 250 coyotes removed by local trappers.

June 9

Trip to Island Park rain in morning and to Greenland Plateau in afternoon.

Symphoricarpus rotundifolia

Forage. Considerable improvement shown by most browsed species.

Abies concolor. Still being rather heavily browsed by deer during summer.

Symphoricarpus. Shows considerable recovery

Robinia. A good many plants that had been killed by fire. Sprouts are coming up from roots.

June 10.

V.T. Ranch to Cedar Ridge.

Left V.T. 9 A.M. and reached Cedar Ridge about 7:30 PM stopping 1¼ hours at ~~&~~ noon for lunch
